## **Sense and Flexibility, What is your Style?**

Our spine is one of the most important part of our body that gives us structure and support. It plays a vital role to enable us to perform simple tasks like standing up and sitting upright. The Autobalance Style's inspiration comes from the structure of the human vertebrae. The idea is to create a chair that simulates the support of the spine. The Autobalance Style is available in two colours, black for a polished and sleek look, white for a fun and edgy office setting.
